

Global Sealer
Technologies

GST's high performance sprayer is specially designed for our sealers and ensures an even, well-distributed spray for best results.

- Three Gallon capacity
- Braided chemical resistant hose
- Includes detachable tip that delivers a fan shaped stream
- Heavy-duty metal pump rod gives sprayer high durability
- Durable chemical resistant poly trigger action grip allows easy spray and shut-off
- Poly extension wand provides increased strength and resistance to chemical corrosion
- Valve locks on for constant spraying
- Valve locks off to prevent accidental discharge
- Funnel top for easy filling
- Replacement tips available

GST sprayers are made with solvent and chemical resistant tips and seals, allowing for long term, multiple use applications. Using inexpensive garden-type sprayers is not recommended as they are not designed for solvents and will fail during application.
